

# Handout 18: Dual-input describing functions

Eric Feron

April 5, 2004

Dual-input describing functions are for mixed signals (sinusoid  
+ small constant signal)  
Approximating non-constant signals with constant ones

Applications

## Dual-input Describing function for switch nonlinearity

Dual-input describing function for switch nonlinearity - cont'd

## Step response of 3rd order motor system
