SCIENTIFIC SPECIALTY: VOLCANOLOGY

Red dots indicate currently or historically active volcanic features

This list obtained from the Smithsonian Institution

This map is part of "Discovering Plate Boundaries," a classroom exercise developed by Dale S. Sawyer at Rice University (dale@rice.edu). Additional information about this exercise can be found at <http://terra.rice.edu/plateboundary/>.

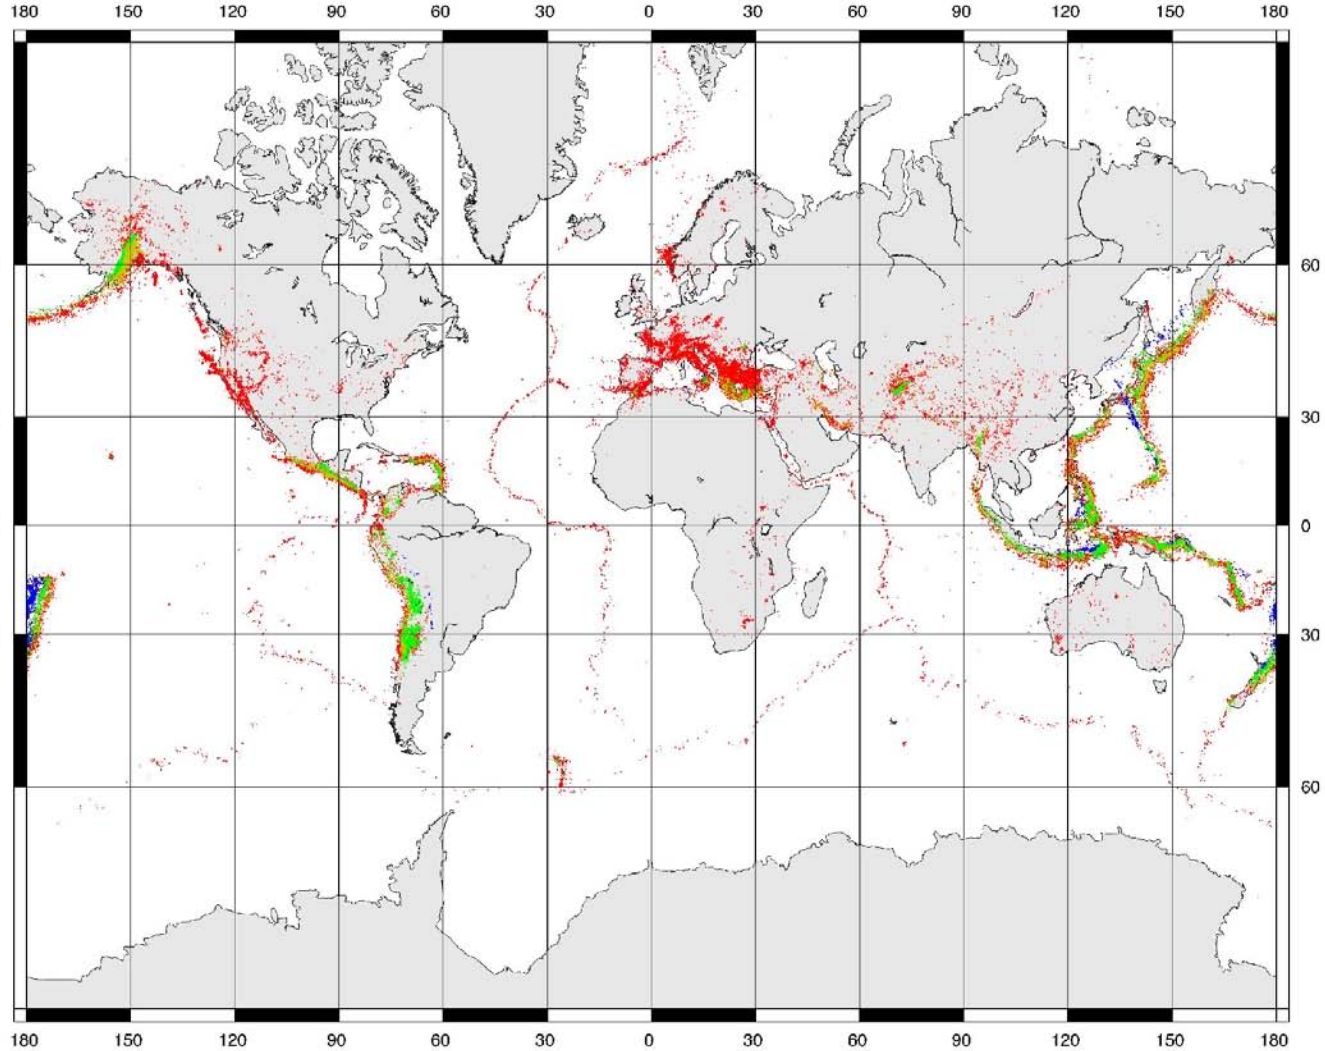

Source: [Discovering Plate Boundaries](#) by Dale S. Sawyer.

SCIENTIFIC SPECIALTY: SEISMOLOGY

Earthquake Locations, 1990 - 1998 (Magnitudes 4 and greater)

Color indicates depth: Red 0-33 km, Orange 33-70 km, Green 70-300 km, Blue 300-700 km

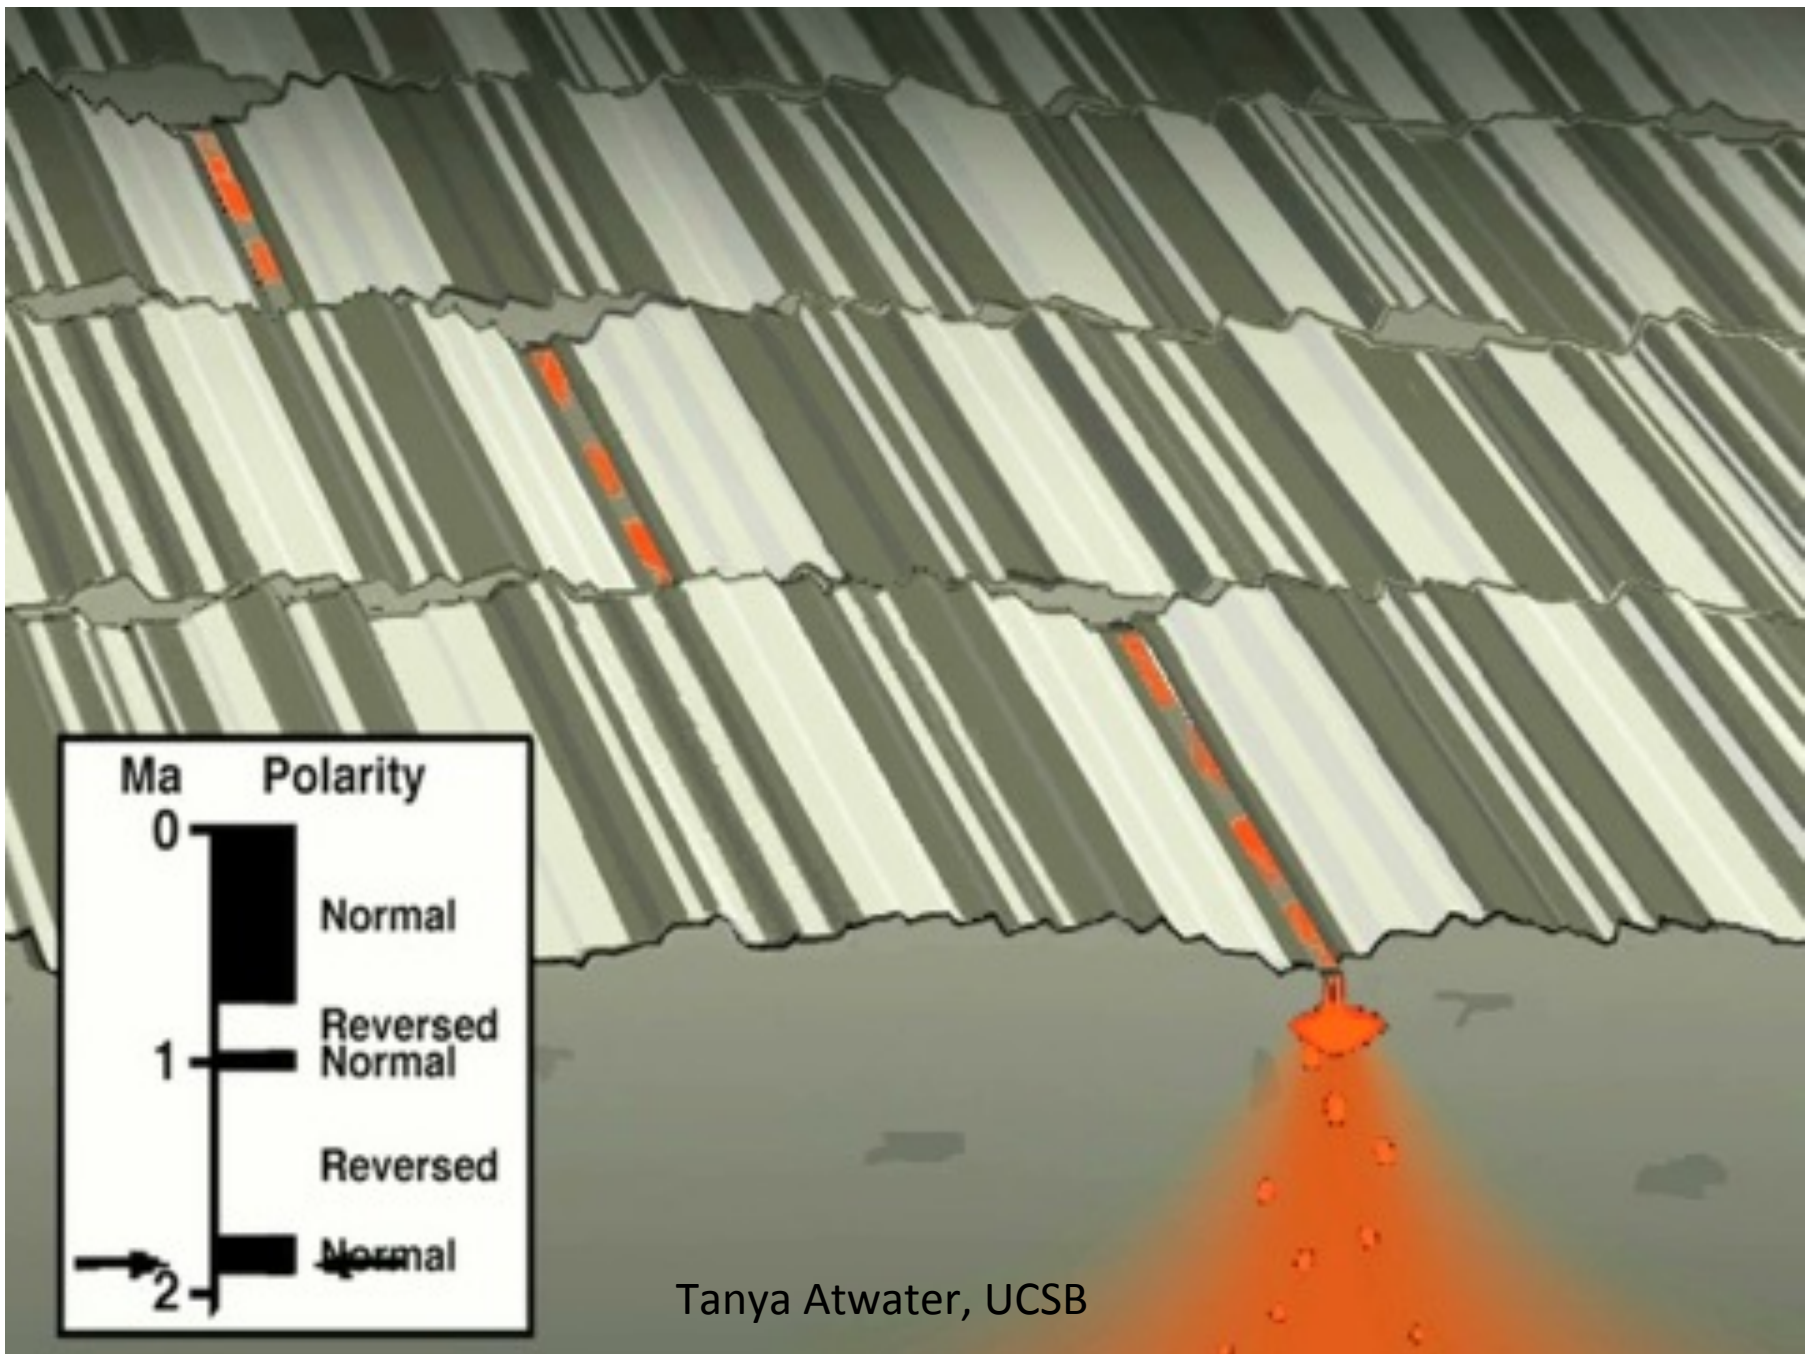

This map is part of "Discovering Plate Boundaries," a classroom exercise developed by Dale S. Sawyer at Rice University (dsaw@rice.edu). Additional information about this exercise can be found at <https://terra.rice.edu/plateboundary/>.

Photograph of trench across large scarp at the Rito Seco site. The trench exposed Santa Fe Formation (QTsf) and overlying fluvial gravel on the upthrown side of the fault and a sequence of three well-defined colluvial wedges (CW 1, CW 2 and CW 3) and remnants of a probable old, fourth wedge (CS 4) on the down-dropped side of the fault zone. Event horizons (EH) show the ground surface at the time of each surface-faulting event.

1.96-1.92 Ga

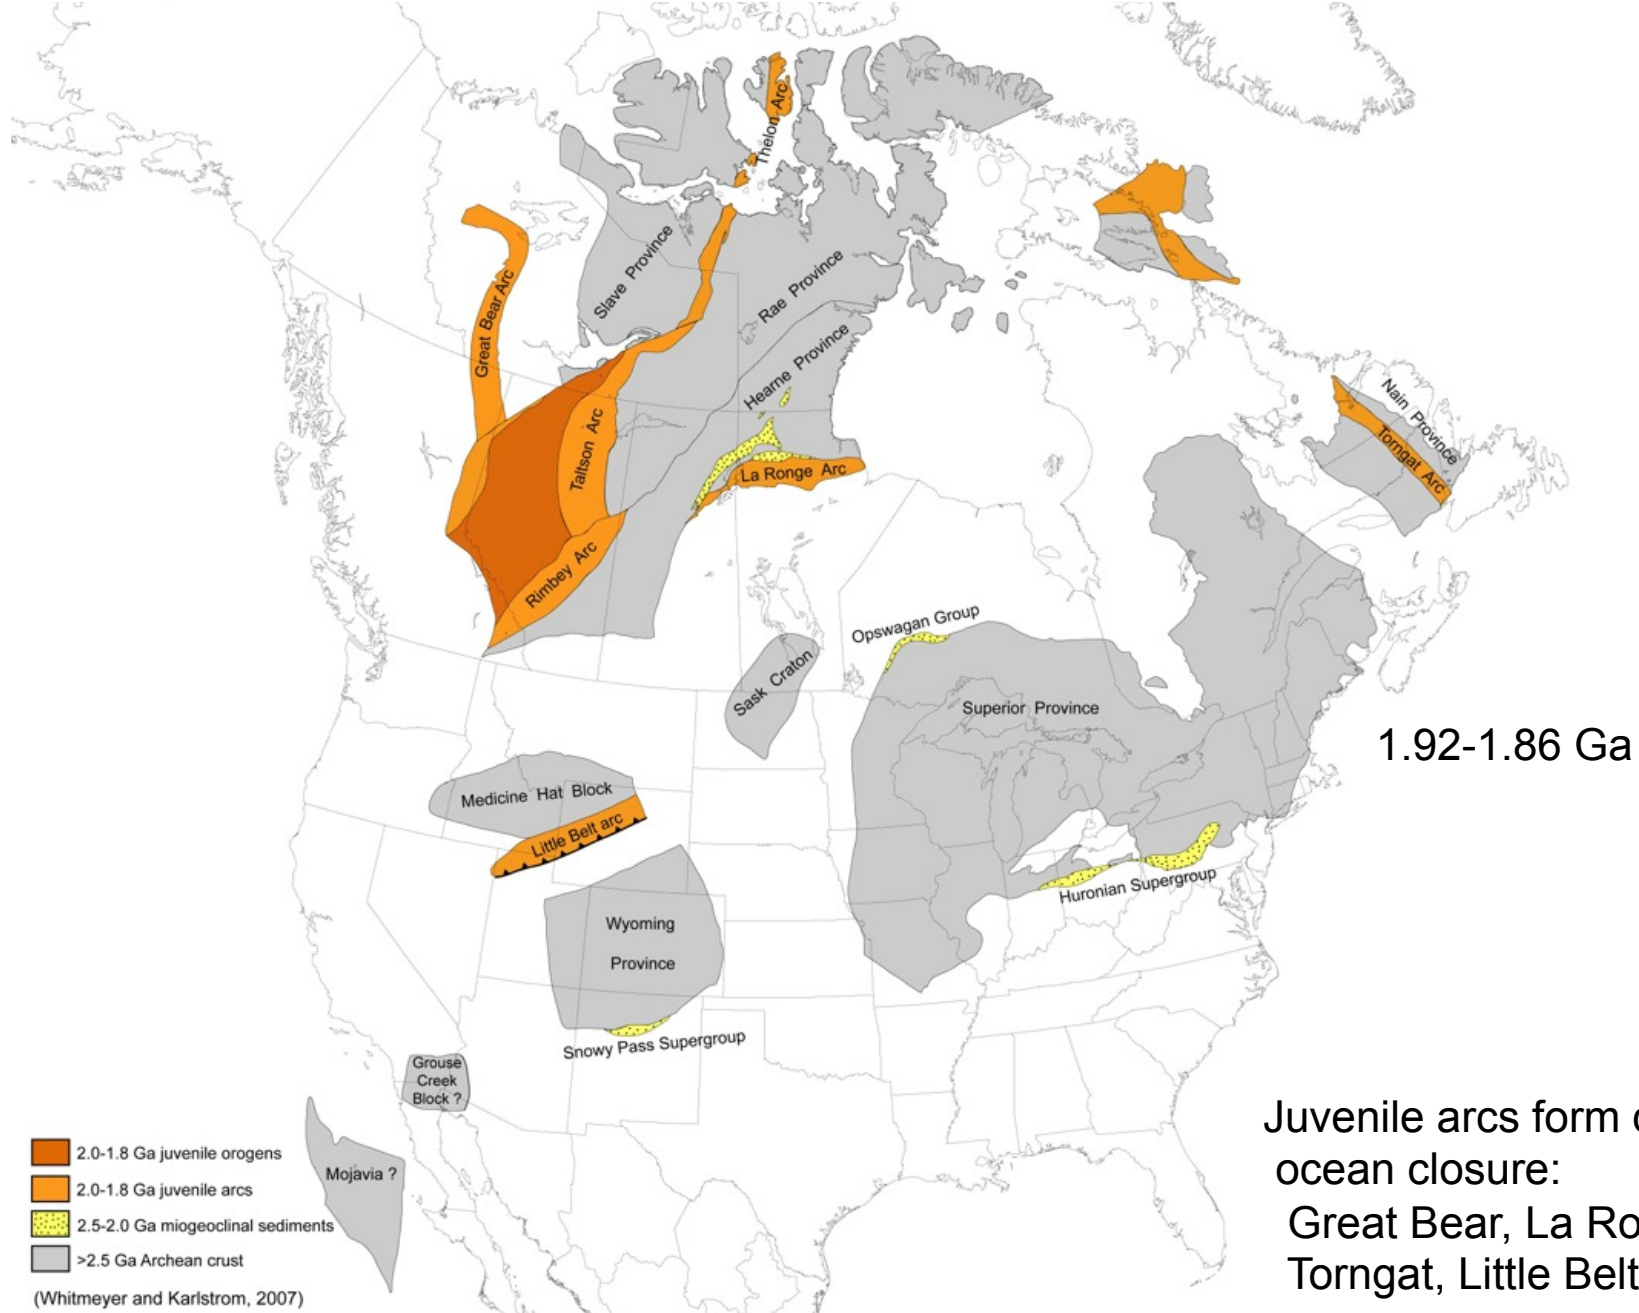

Slave-Rae collision,
Arc accretion: Rimbey,
Taltson, Thelon arcs

- 2.0-1.8 Ga juvenile arcs
- 2.5-2.0 Ga miogeoclinal sediments
- >2.5 Ga Archean crust

(Whitmeyer and Karlstrom, 2007)

1.86-1.84 Ga

Continued juvenile arc accretion: Narsajuaq, Pembine-Wausau; Wopmay orogen; Southeast thrusting along Snowbird tectonic zone

Courtesy of Geological Society of America. Used with permission.

Source: Whitmeyer, Steven J., and Karl E. Karlstrom. "Tectonic Model for the Proterozoic Growth of North America." *Geosphere* 3, no. 4 (2007): 220-59.

1.84-1.82 Ga

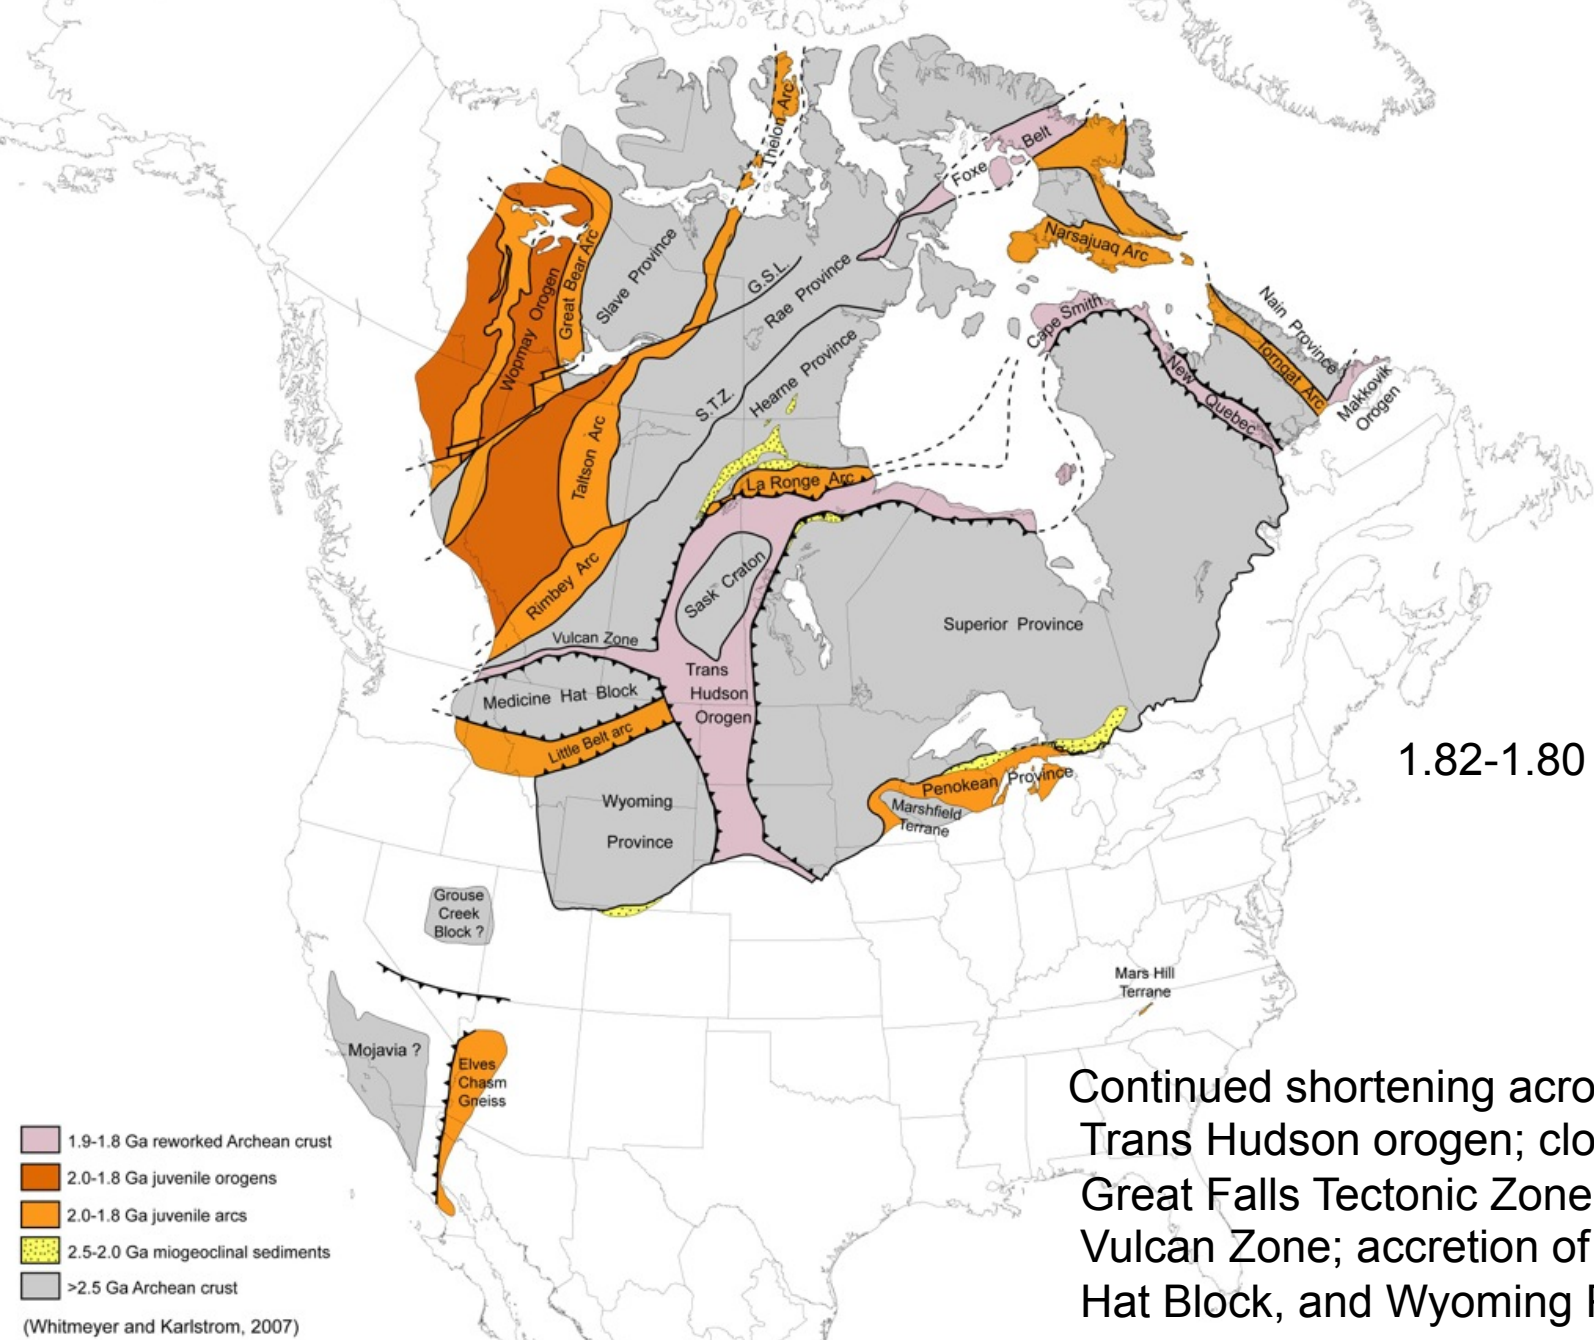

Trans Hudson orogen:
 Superior-Rae-Hearne continent-
 continent collision, includes
 accretion of Sask craton;
 Elves Chasm arc outboard of Mojavia

- 1.9-1.8 Ga reworked Archean crust
- 2.0-1.8 Ga juvenile orogens
- 2.0-1.8 Ga juvenile arcs
- 2.5-2.0 Ga miogeoclinal sediments
- >2.5 Ga Archean crust

(Whitmeyer and Karlstrom, 2007)

1.82-1.80 Ga

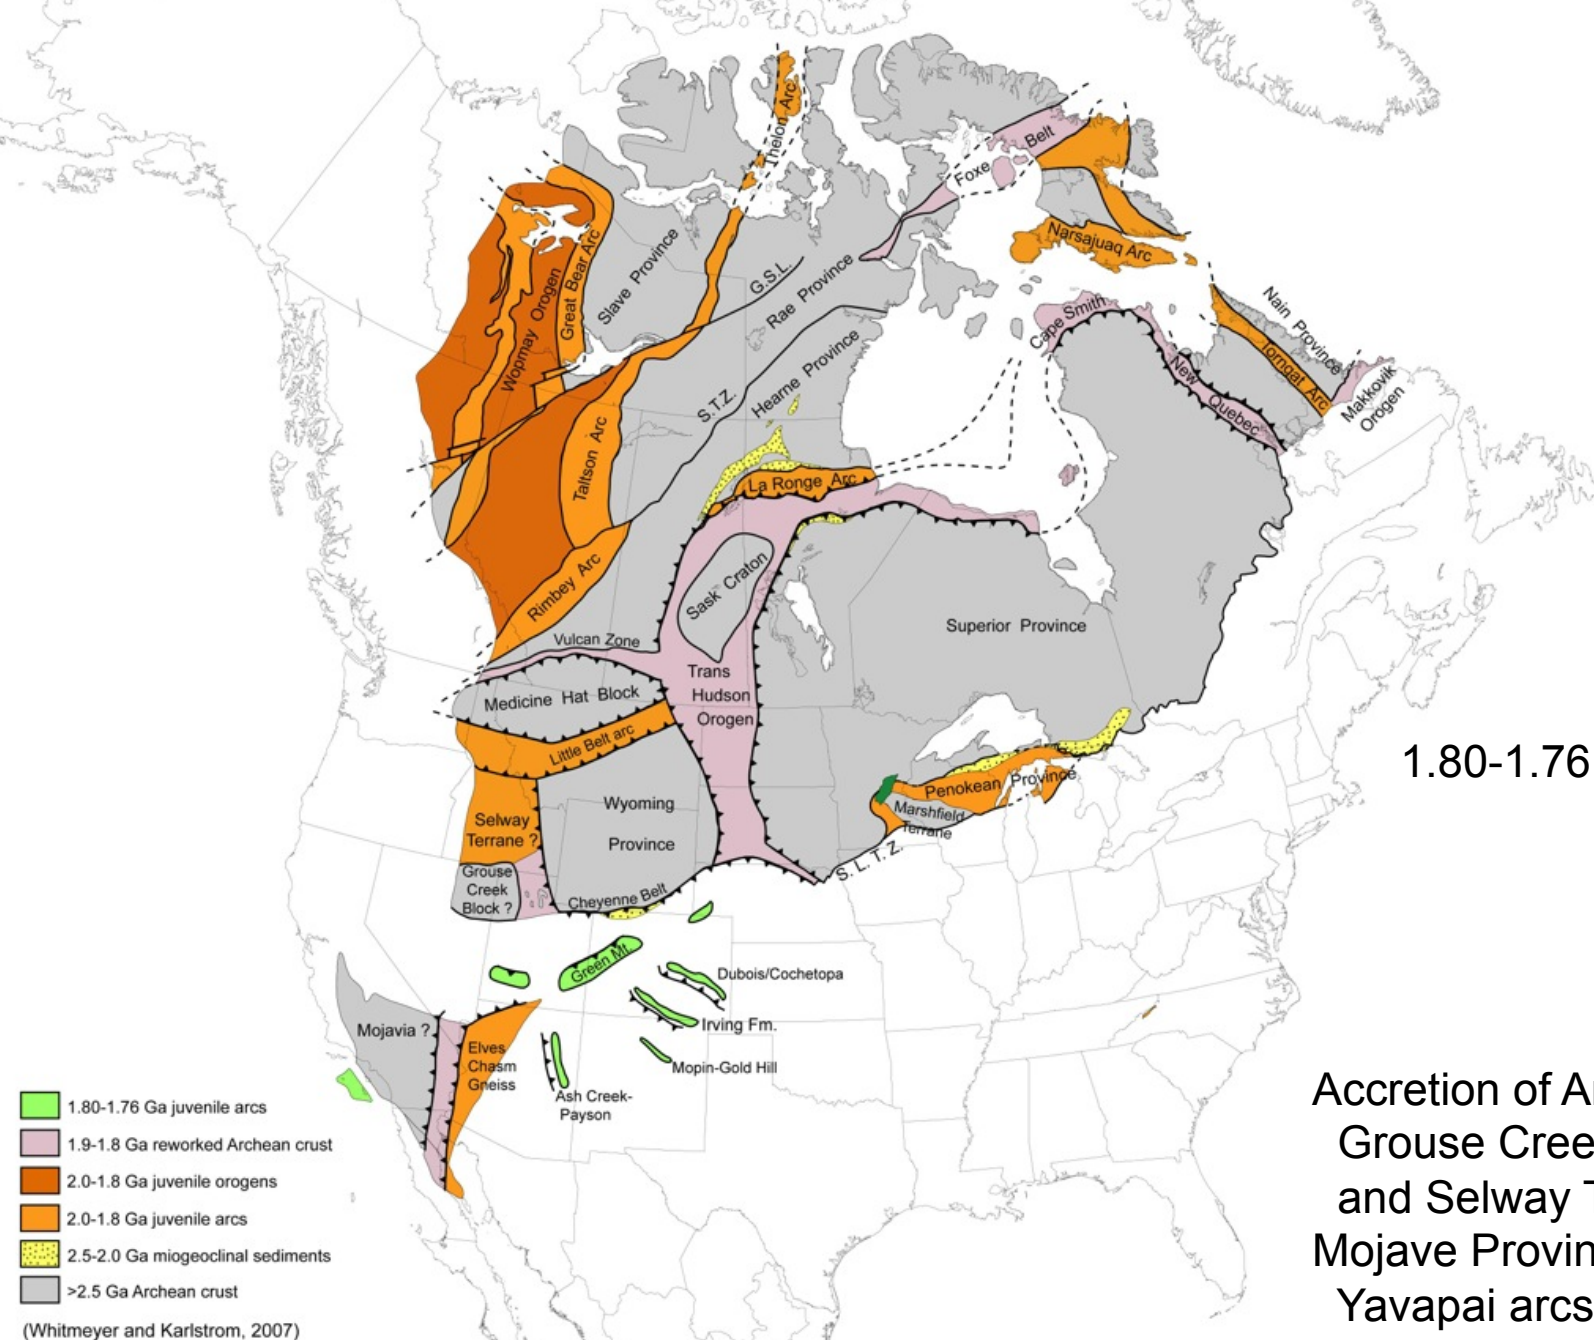

Continued shortening across Trans Hudson orogen; closure of Great Falls Tectonic Zone and Vulcan Zone; accretion of Medicine Hat Block, and Wyoming Province

- 1.9-1.8 Ga reworked Archean crust
- 2.0-1.8 Ga juvenile orogens
- 2.0-1.8 Ga juvenile arcs
- 2.5-2.0 Ga miogeoclinal sediments
- >2.5 Ga Archean crust

(Whitmeyer and Karlstrom, 2007)

1.80-1.76 Ga

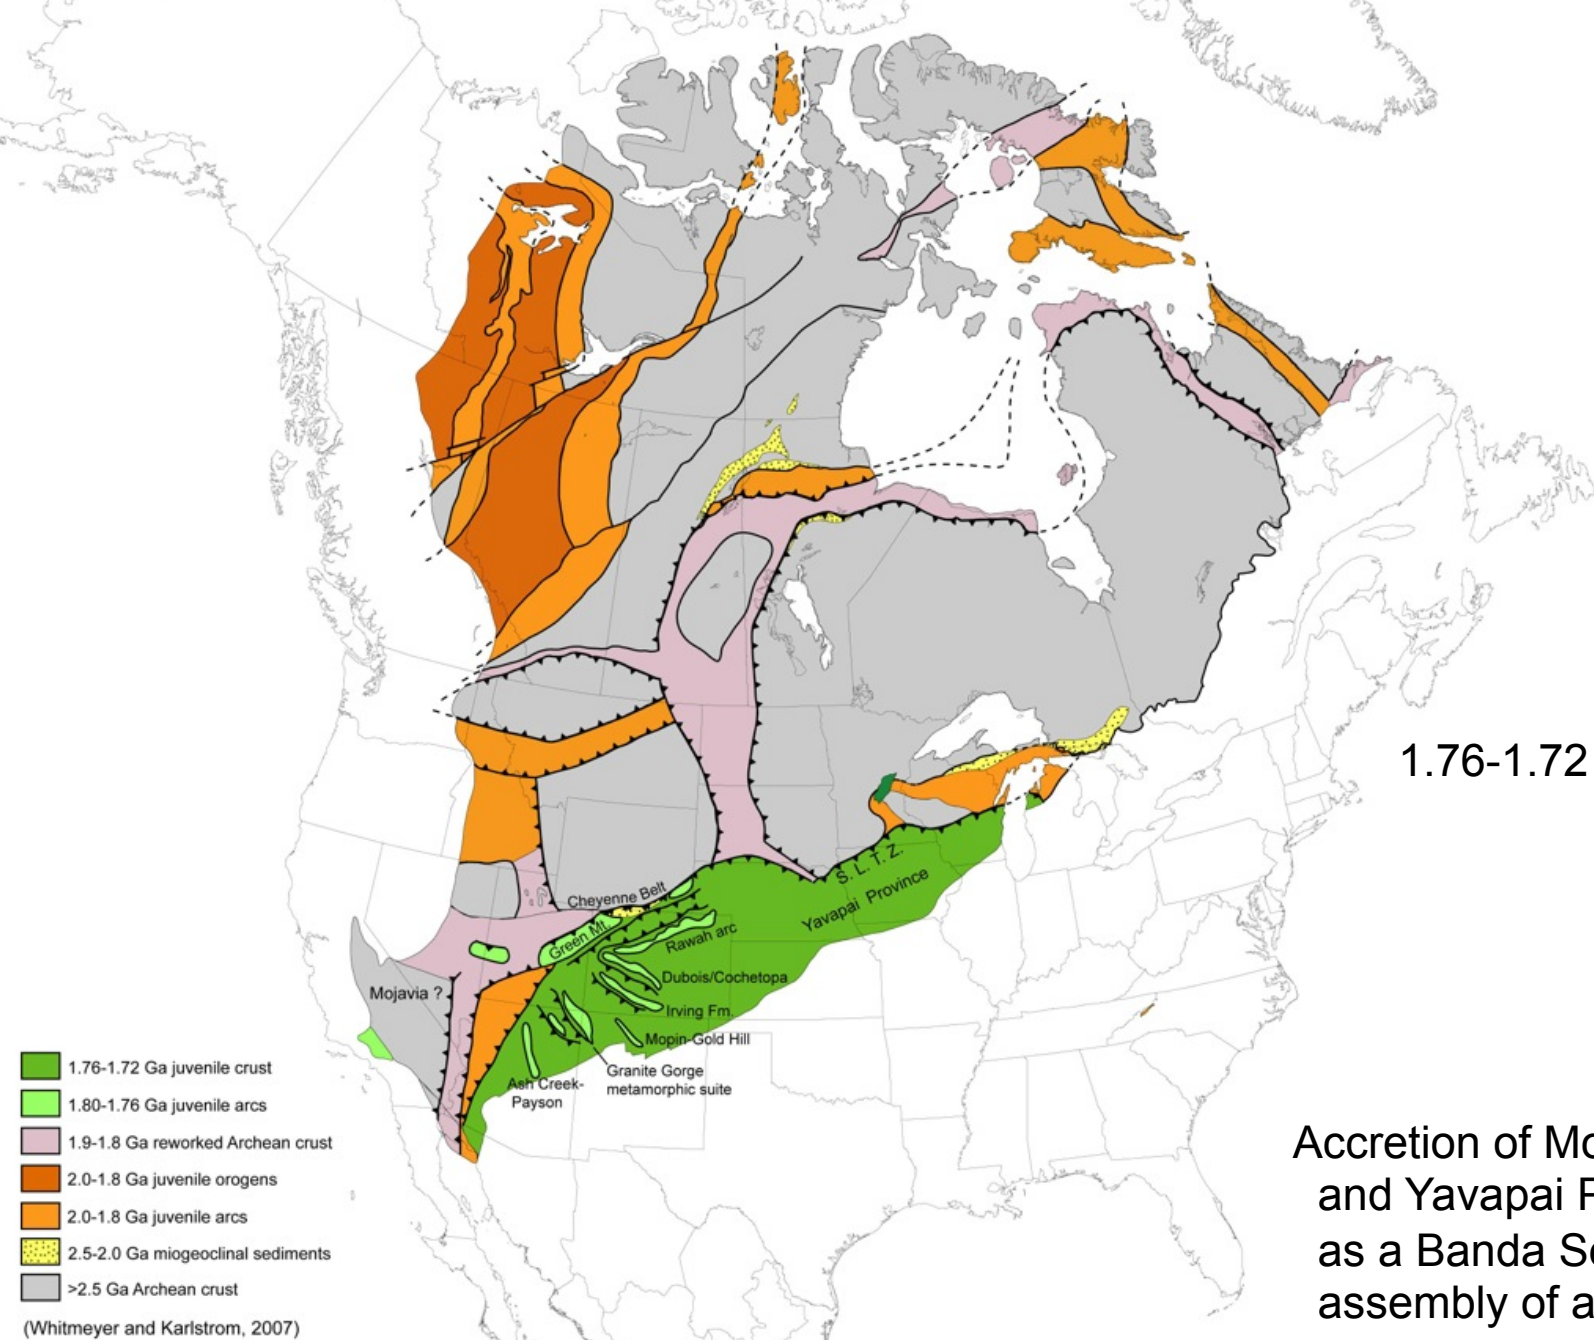

Accretion of Archean(?)
 Grouse Creek Block
 and Selway Terrane;
 Mojave Province and
 Yavapai arcs outboard

- 1.80-1.76 Ga juvenile arcs
- 1.9-1.8 Ga reworked Archean crust
- 2.0-1.8 Ga juvenile orogens
- 2.0-1.8 Ga juvenile arcs
- 2.5-2.0 Ga miogeoclinal sediments
- >2.5 Ga Archean crust

(Whitmeyer and Karlstrom, 2007)

Source: Whitmeyer, Steven J., and Karl E. Karlstrom. "Tectonic Model for the Proterozoic Growth of North America." *Geosphere* 3, no. 4 (2007): 220-59.

1.76-1.72 Ga

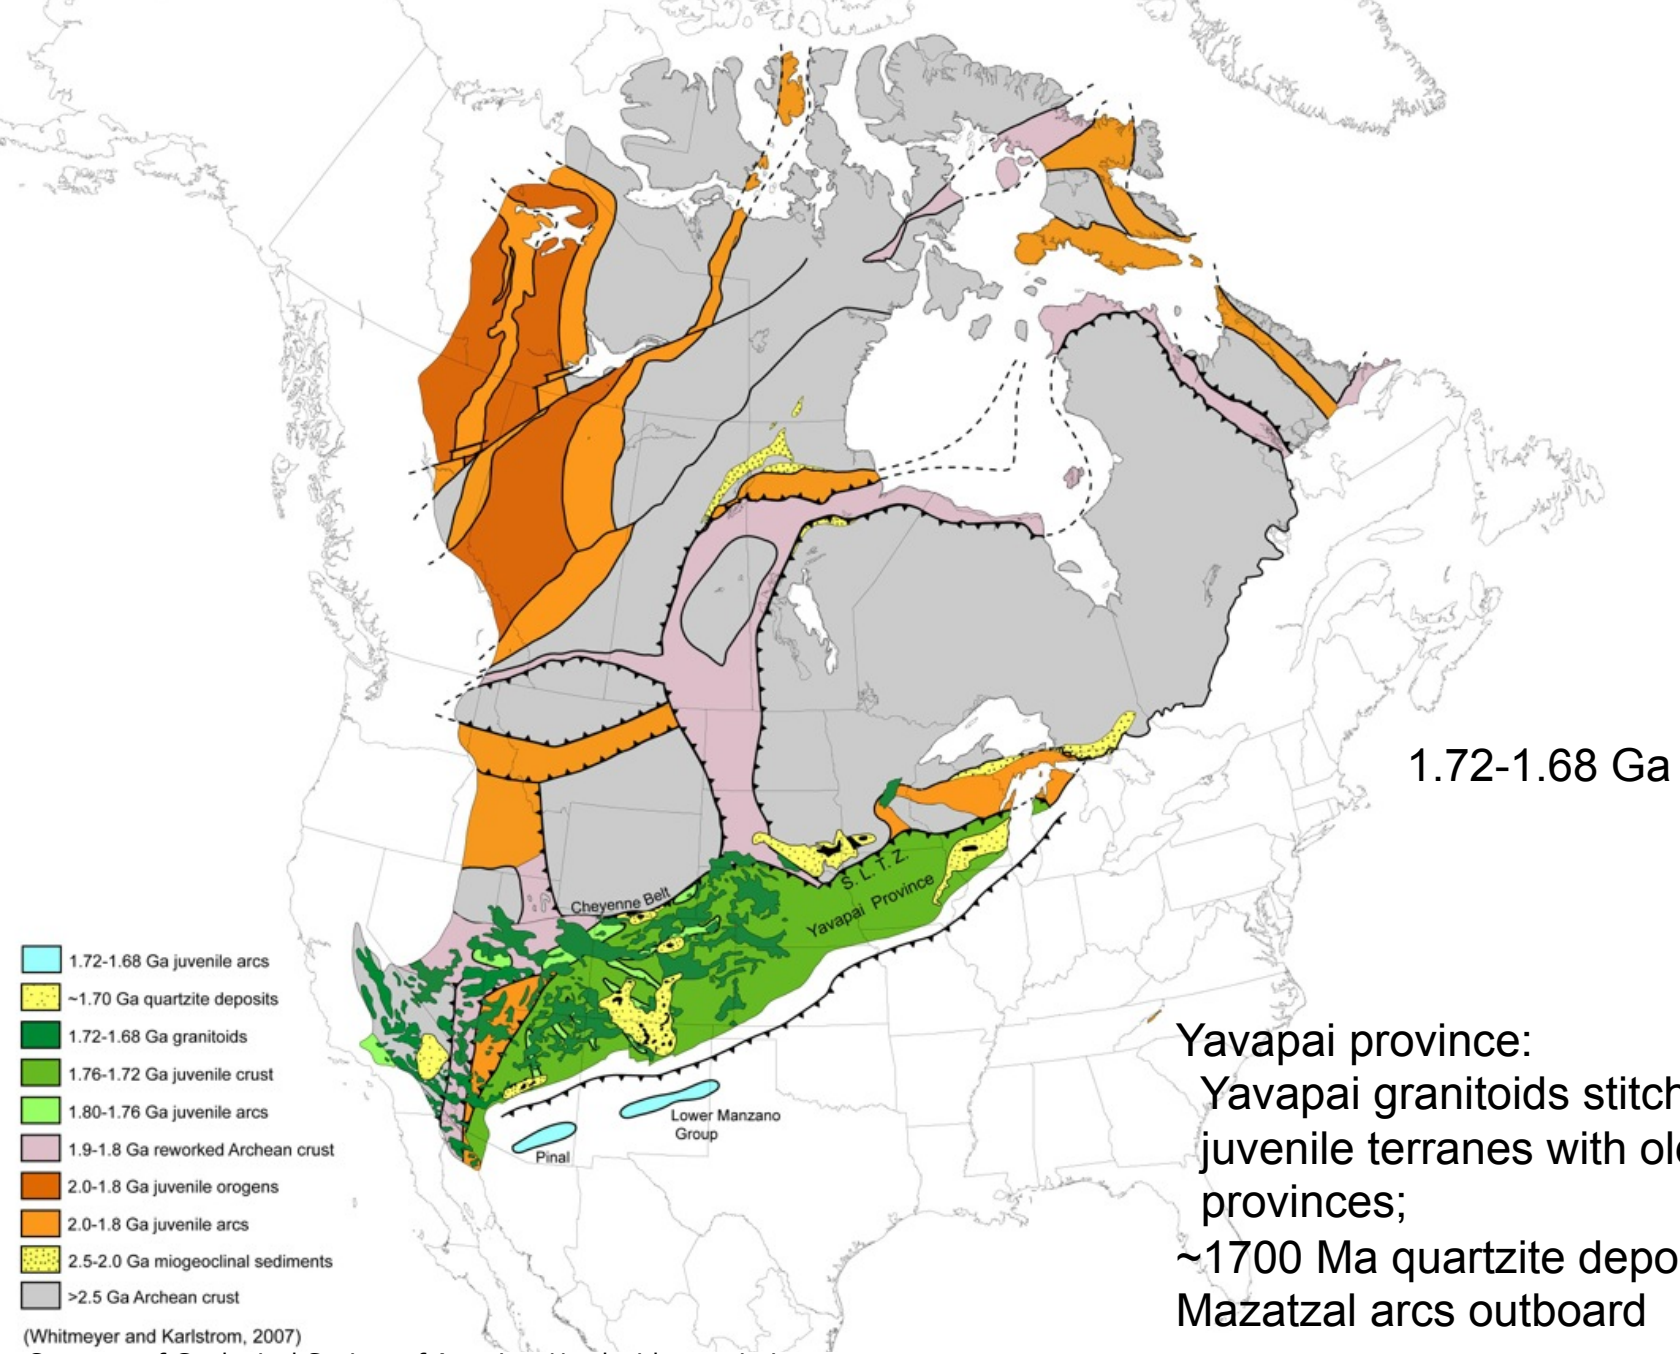

Accretion of Mojavia(?)
and Yavapai Province,
as a Banda Sea style
assembly of arcs

- 1.76-1.72 Ga juvenile crust
- 1.80-1.76 Ga juvenile arcs
- 1.9-1.8 Ga reworked Archean crust
- 2.0-1.8 Ga juvenile orogens
- 2.0-1.8 Ga juvenile arcs
- 2.5-2.0 Ga miogeoclinal sediments
- >2.5 Ga Archean crust

(Whitmeyer and Karlstrom, 2007)

1.72-1.68 Ga

Yavapai province:
 Yavapai granitoids stitch
 juvenile terranes with older
 provinces;
 ~1700 Ma quartzite deposition;
 Mazatzal arcs outboard

- 1.72-1.68 Ga juvenile arcs
- ~1.70 Ga quartzite deposits
- 1.72-1.68 Ga granitoids
- 1.76-1.72 Ga juvenile crust
- 1.80-1.76 Ga juvenile arcs
- 1.9-1.8 Ga reworked Archean crust
- 2.0-1.8 Ga juvenile orogens
- 2.0-1.8 Ga juvenile arcs
- 2.5-2.0 Ga miogeoclinal sediments
- >2.5 Ga Archean crust

(Whitmeyer and Karlstrom, 2007)

 26

1.69-1.65 Ga

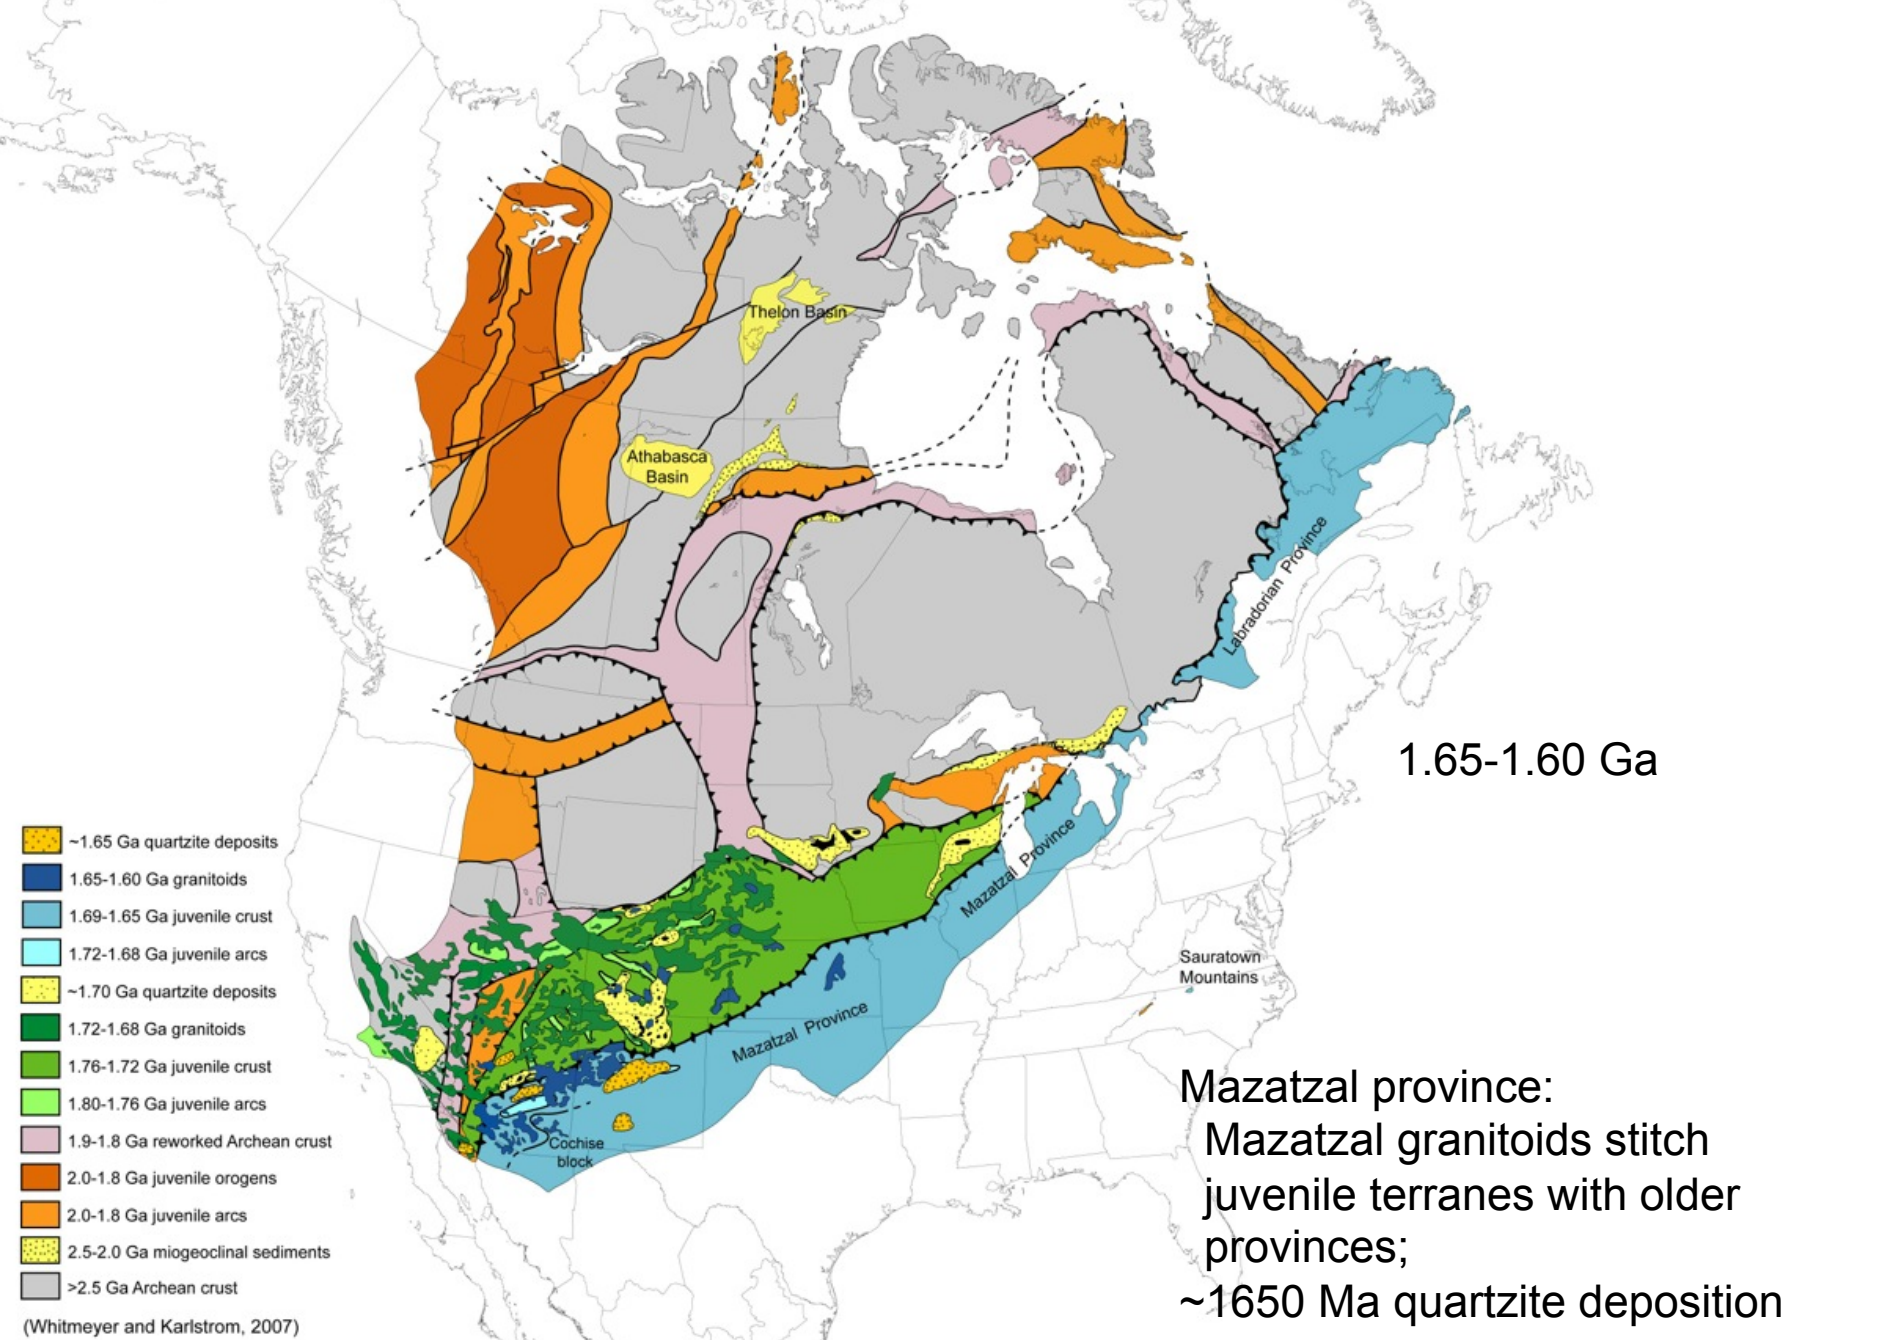

Accretion of Mazatzal and Labradorian Provinces, as juvenile crust

- 1.69-1.65 Ga juvenile crust
- 1.72-1.68 Ga juvenile arcs
- ~1.70 Ga quartzite deposits
- 1.72-1.68 Ga granitoids
- 1.76-1.72 Ga juvenile crust
- 1.80-1.76 Ga juvenile arcs
- 1.9-1.8 Ga reworked Archean crust
- 2.0-1.8 Ga juvenile orogens
- 2.0-1.8 Ga juvenile arcs
- 2.5-2.0 Ga miogeoclinal sediments
- >2.5 Ga Archean crust

- 1.45-1.35 Ga granitoids
- 1.55-1.35 Ga juvenile crust
- ~1.65 Ga quartzite deposits
- 1.65-1.60 Ga granitoids
- 1.69-1.65 Ga juvenile crust
- 1.72-1.68 Ga juvenile arcs
- ~1.70 Ga quartzite deposits
- 1.72-1.68 Ga granitoids
- 1.76-1.72 Ga juvenile crust
- 1.80-1.76 Ga juvenile arcs
- 1.9-1.8 Ga reworked Archean crust
- 2.0-1.8 Ga juvenile orogens
- 2.0-1.8 Ga juvenile arcs
- 2.5-2.0 Ga miogeoclinal sediments
- >2.5 Ga Archean crust

Granite-Rhyolite Province:
A-type plutons stitch much
of southern Laurentia
