The interventions

nutrition

fluids

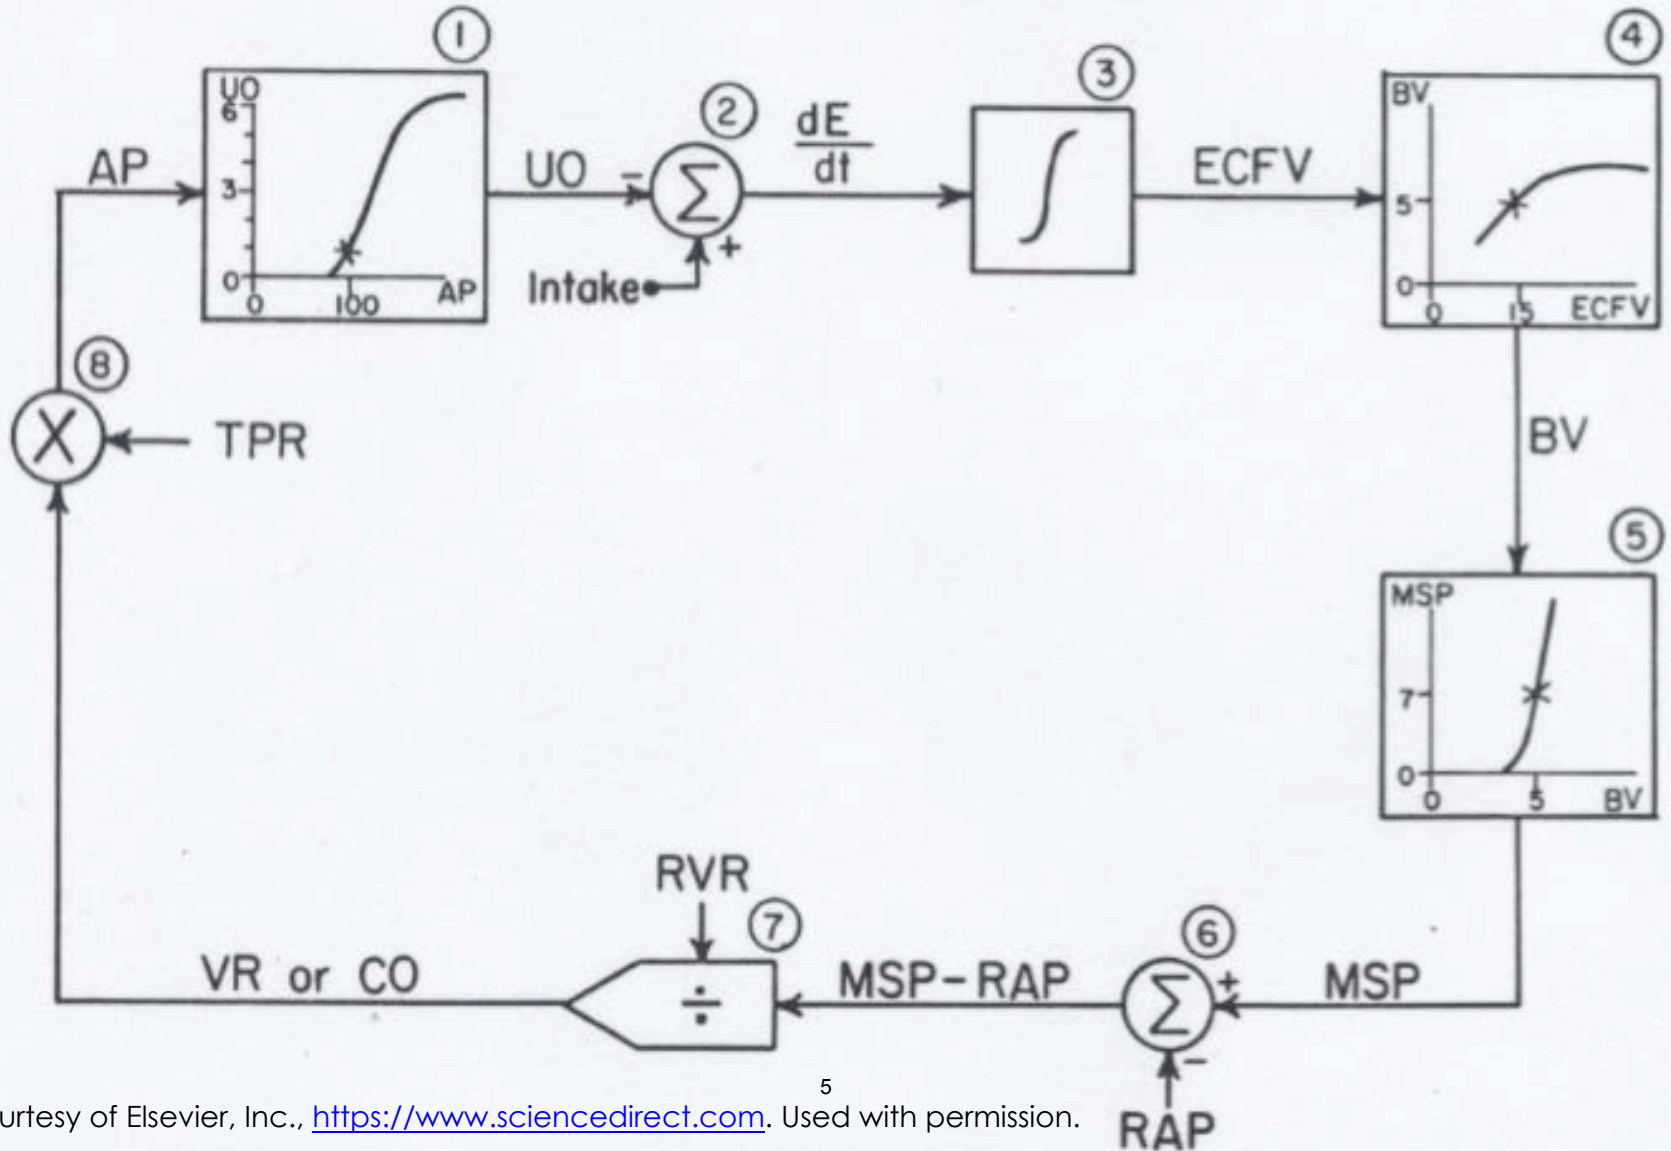

medications
(infusion pumps)

ventilator
controls

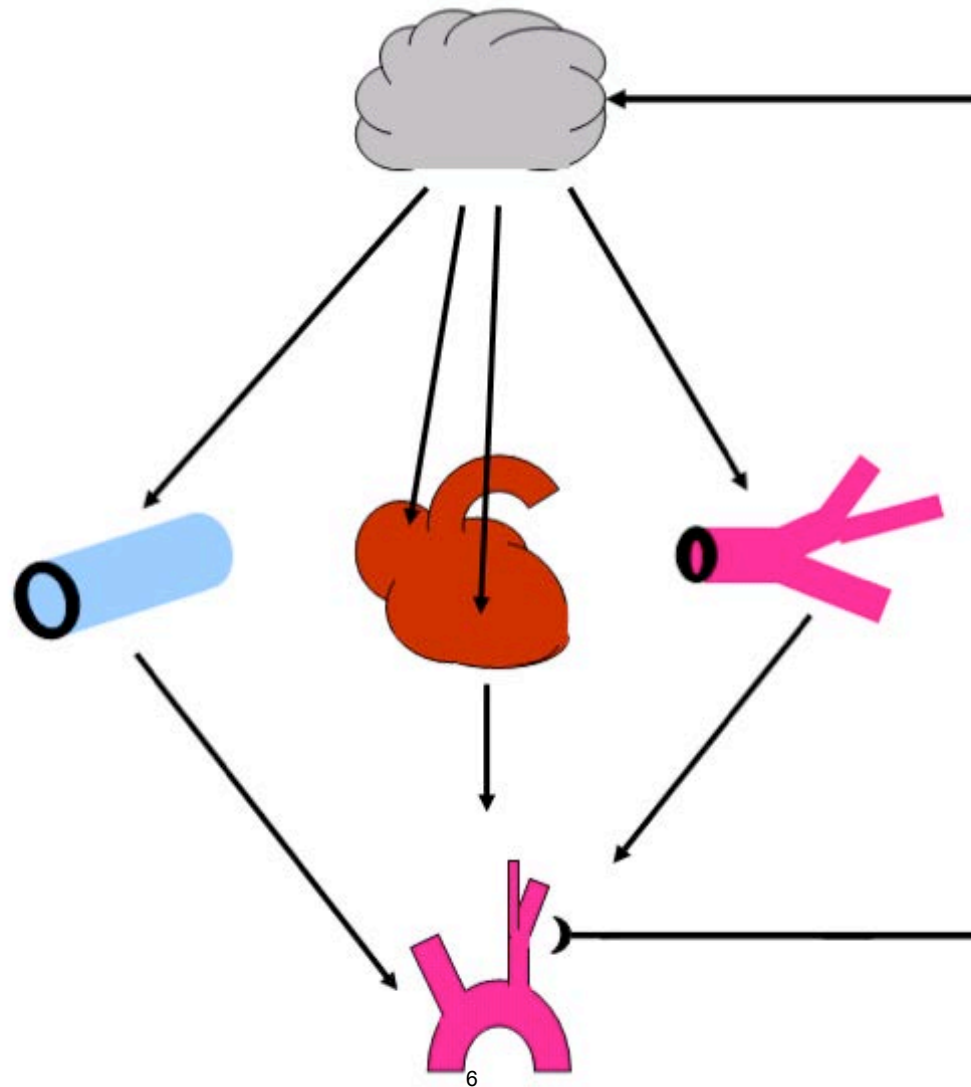

head-of-bed
angle

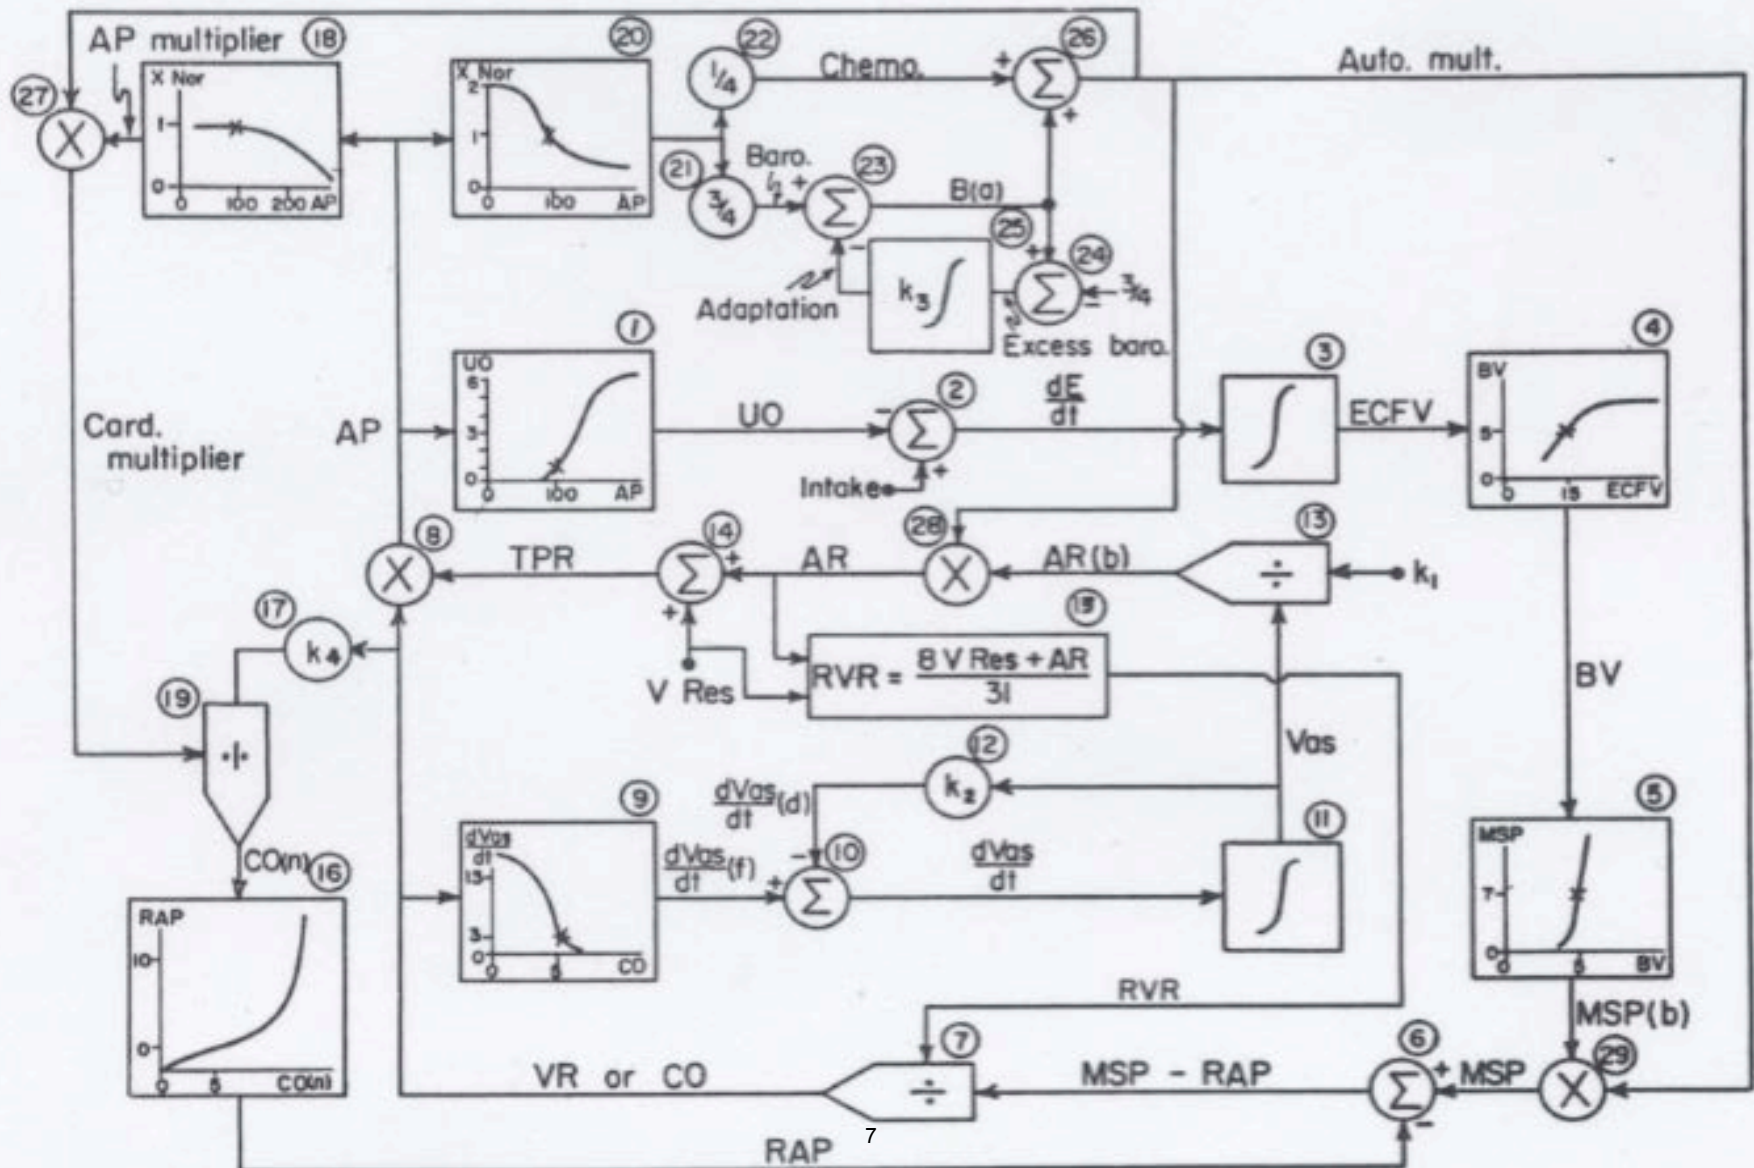

Blood pressure regulation (Guyton 1972)

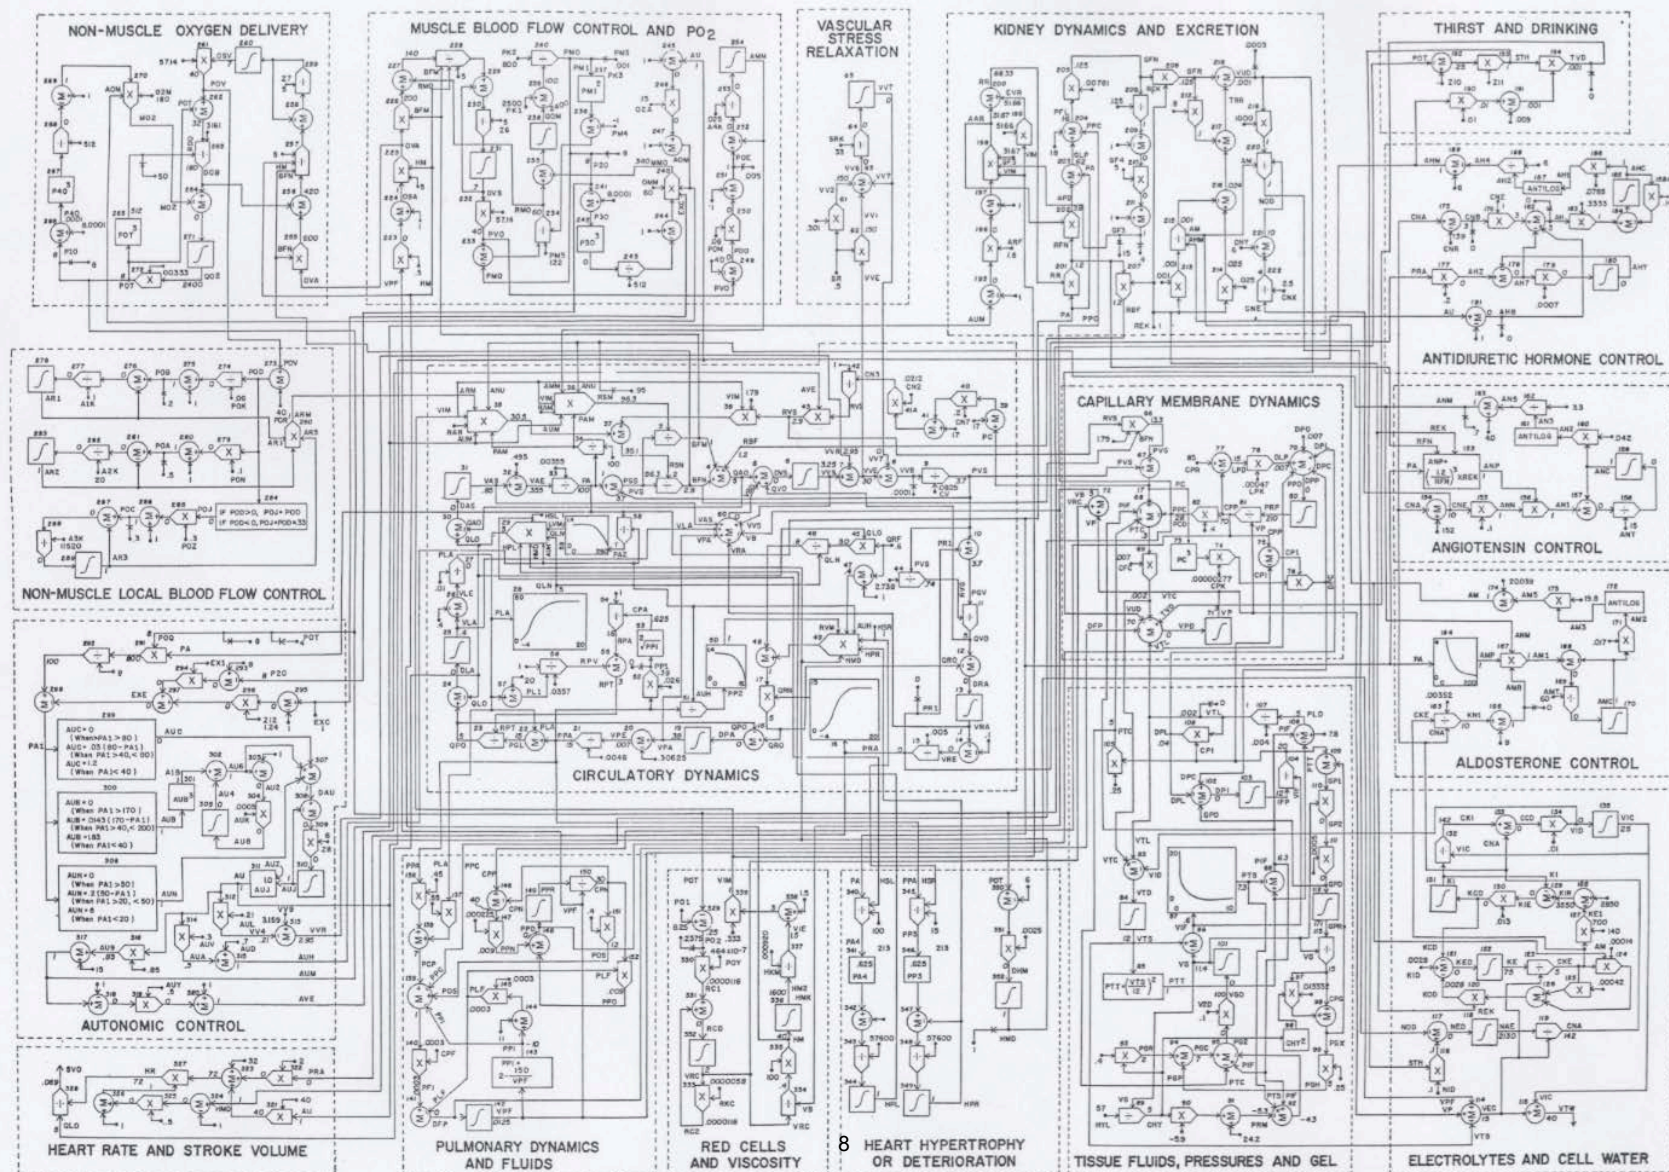

Baroreflex

Blood pressure regulation +

Blood pressure regulation +++

Time-based capnography

Exhaled CO₂ partial pressure (PeCO₂) vs. time

Non-invasive

Effort-independent

Portable (point-of-care)

Oridion. Microstream Bedside Capnography Monitoring - CS08653 Data Sheet, 2012.

Mechanistic model for capnography

... and the governing equations

$$L\ddot{V}(t) + R\dot{V}(t) + \frac{V(t)}{C} = \Delta P$$

$$\dot{p}_D(t) = \frac{-p_D(t) + p_A}{V_D} \dot{V}(t), \quad \dot{V}(t) > 0$$

$$\dot{p}_D(t) = \frac{p_D(t)}{V_D} \dot{V}(t), \quad \dot{V}(t) < 0$$

Preprocessed and Estimated Capnograms

What we'll (un)cover

- Brief review of linear, time-invariant (LTI) system models in continuous and discrete time (CT and DT), and in the frequency domain. Deterministic autocorrelation. (Sections 1.1–1.3)
- State–space models (mainly LTI). (Chapters 4, 5 and 6)
- Brief review of random variables. (Chapter 7)
- Estimation. (Chapter 8)
- Stationary random processes in time and frequency domains. (Chapters 10 and 11)

What we'll (un)cover

- Signal estimation. (Chapter 12)
- Hypothesis testing. (Chapter 9)
- Some intimations of machine learning: training and applying quadratic discriminators in feature space. (Based on Chapter 9)
- Signal detection. (Chapter 13)
- Hidden Markov models (briefly, as a counterpoint to LTI state-space models).
